

Join the leader in entertainment innovation and help us design the future. At Dolby, science meets art, and high tech means more than computer code. As a member of the Dolby team, you'll see and hear the results of your work everywhere, from movie theaters to smartphones. We continue to revolutionize how people create, deliver, and enjoy entertainment worldwide. To do that, we need the absolute best talent. We're big enough to give you all the resources you need, and small enough so you can make a real difference and earn recognition for your work. We offer a collegial culture, challenging projects, and excellent compensation and benefits.

*Would you like to be part of the exciting future of entertainment and add your talents to those of an amazing team?*

We are looking for a European Patent Attorney who will be actively involved in evolving our European Patent Group, including contributing to defining and implementing regional and/or global patent filing strategies. This role will be reporting to the Senior Director of Global IP Strategy and Patent Operations.

The successful candidate will be a recently qualified or soon-to-be qualified European patent attorney and will have a deep understanding of patenting computer-implemented inventions, preferably audio-coding inventions and/or video-coding inventions. The position will involve a significant amount of prosecution before the EPO, as well as interacting with experts in both technical and legal disciplines, capturing invention disclosures and advising on third party intellectual property matters.

### **KEY TASKS:**

- Draft, file and prosecute patent applications before the EPO.
- Support development of internal systems and processes for managing European patent applications.
- Support definition and implementation of regional and/or global patent filing strategies.
- Provide information and training to internal groups as required regarding patent protection procedures and programs, particularly patent prosecution before the EPO.
- Support generation and acquisition of important invention disclosures.
- Advise on third-party patent claims against products and technologies.
- Provide another patent, licensing and intellectual property support as

may be assigned, such as acquisition, development, and commercialization of third-party technologies and related intellectual property matters.

**OTHER RESPONSIBILITIES:**

- Perform duties as assigned by immediate supervisor or members of the Dolby management team, subject to approval by the direct manager and/or departmental VP.
- Perform tasks necessary to complete company objectives.

**KNOWLEDGE, SKILLS, EXPERIENCE, AND EDUCATION REQUIRED:**

- Recently or soon to be admitted to practice before the European Patent Office.
- Physics or Engineering degree, preferably advanced degree in electrical engineering with an emphasis on digital signal processing.
- Excellent writing and communication skills in English.
- Self-initiative and ability to work with a minimum of direction under pressure.
- Superior organization and project management skills.
- Proficiency in standard office environment software (Word, Excel, PowerPoint).

**ADDITIONAL DESIRED QUALIFICATIONS/ EXPERIENCE:**

- Research and/or engineering experience in digital signal processing, preferably audio or video coding.
- Experience at a patent attorney firm or a law firm.
- Working with different worldwide patent filing strategies.

**EVERY BIT AMAZING!**
